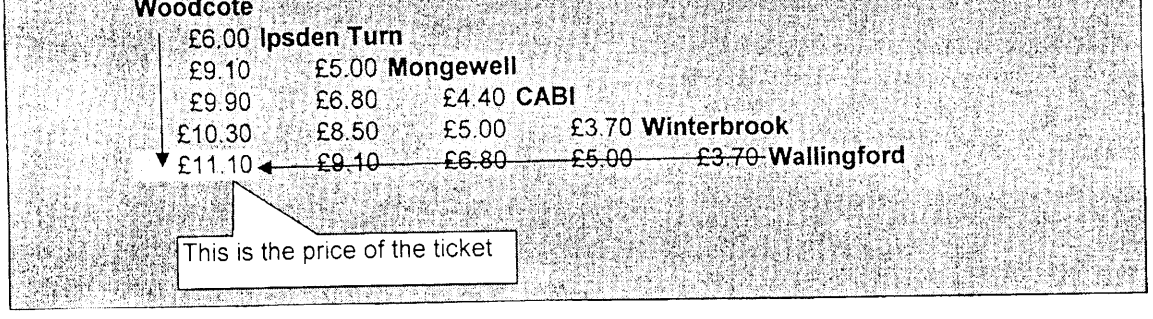
To calculate the cost of your pass find the place from which you want to travel from and the place you want to travel to, move along the column until you reach the row on which the other place is on. Where the column and row meet is the cost.


Example: From Woodcote to Wallingford, move down the column under Woodcote until you reach the row with Wallingford in it, where they meet is the cost, which is £11.10 for Woodcote - Wallingfor((example only - not actual fare)
